

OUR LEARNING EXCLUSIVE

- Custom exam prep software and materials
- Course-specific thinQtank[®] Learning publications to make the learning fun and engaging
- Hands-on labs and design case studies on live Google Cloud projects
- **We do not teach the test.** We always deliver valuable hands-on experience
- All reading material and study guides sent to you when you register
- Every course taught by Google Cloud-certified practitioners
- Six months mentoring access to our engineers after the course

TRAINING CAMP FORMAT

thinQtank[®] Learning delivers this course as a **four-day instructor-led training camp**, Monday to Thursday. About 50% lecture and 50% hands-on labs and design case studies. Contact us for the schedule covering your dates.

PREREQUISITES

- No certification is required
- 3+ years of industry experience including 1+ years designing and managing solutions using Google Cloud (Google's recommendation)
- Associate Cloud Engineer, or equivalent hands-on Google Cloud experience, is a strong foundation

TARGET AUDIENCE

- Cloud network engineers
- Network architects
- Network administrators
- Network security engineers

CERTIFICATION

This course prepares you for the Google Cloud Professional Cloud Network Engineer certification exam.

Delivery	Online proctored or Pearson VUE test center
Format	50–60 questions, 120 minutes
Exam fee	\$200, set by Google Cloud
Renewal	Valid 2 years

COURSE OVERVIEW

thinQtank[®] Learning is offering a unique four-day training camp comprised of four days of instructor-led learning that gives students the knowledge and skills needed to design, plan and implement Google Cloud VPC networks, configure managed network services, build hybrid and multicloud interconnectivity, manage and troubleshoot network operations, and implement cloud network security.

The camp follows the six sections of the current Google Cloud Professional Cloud Network Engineer exam guide, with hands-on labs and design case studies on live Google Cloud projects throughout.

This course prepares you for **the Google Cloud Professional Cloud Network Engineer certification exam.**

WHAT YOU WILL BE ABLE TO DO

- Design overall network architecture, VPC networks and resilient hybrid/multicloud networks
- Configure VPCs, routing, Network Connectivity Center and GKE networking
- Configure load balancing, Cloud CDN and Cloud DNS
- Configure Cloud Interconnect, IPsec VPN and Cloud Router
- Monitor and troubleshoot with Google Cloud Observability and Network Intelligence Center
- Configure Cloud Armor, Cloud NGFW and VPC firewall policies
- Secure internet egress with Cloud NAT and Secure Web Proxy and deploy network virtual appliances

EXCLUSIVE LEARNING PACKAGE

- Professional Cloud Network Engineer reading plan and review guide
- Professional Cloud Network Engineer practice exams
- Lab guide you keep after the course
- Course video recordings for review

DELIVERY METHODS

- Instructor-led training
- Immersive live-online training
- On-site and custom delivery

GOOGLE CLOUD CERTIFICATION PATHS				
Foundational Cloud Digital Leader · Generative AI Leader Business, sales and non-technical roles	Associate Cloud Engineer · Workspace Admin · Data Practitioner Hands-on admins and early-career engineers	Infrastructure & Apps Architect · Developer · DevOps · Network · Database Architects, developers and operators	Data & AI Data Engineer · ML Engineer · Agentic Architect Data and AI builders	Security Cloud Security Engineer · Security Operations Engineer Security engineers and SOC teams

COURSE MODULES	
01 Network Architecture Design	02 VPC Network Design
03 Hybrid and Multicloud Network Design	04 Configuring VPCs and Routing
05 Network Connectivity Center	06 GKE Networking
07 Load Balancing and Cloud CDN	08 Cloud DNS
09 Cloud Interconnect, VPN and Cloud Router	10 Monitoring and Troubleshooting with Network Intelligence Center
11 Cloud Armor, NGFW and Firewall Policies	12 Egress Security, NAT, Secure Web Proxy and Appliances
13 Exam Review	

EXAM DOMAINS		
Designing and planning a Google Cloud VPC network		21%
Implementing a VPC network		20%
Configuring managed network services		16%
Configuring and implementing hybrid and multicloud network interconnectivity		16%
Managing, monitoring, and troubleshooting network operations		14%
Configuring, implementing and managing a cloud network security solution		13%
