

OUR LEARNING EXCLUSIVE

- Custom exam prep software and materials
- Exam delivery in the classroom, with a **98% success rate**
- Course-specific thinQtank® Learning publications to make the learning fun and engaging
- Extended hours of training, including immersive practical exercises
- **We do not teach the test.** We always deliver valuable examples and discussion
- All reading material and study guides sent to you when you register
- Every course taught by certified expert practitioners

TRAINING CAMP FORMAT

thinQtank® Learning delivers this course as an **instructor-led training camp**. It combines class learning with testing built for the hardest kinds of exam question, and the practice questions are designed to teach through practice so you can apply what you learned rather than recall it. Camps are scheduled by cohort rather than to a fixed calendar. Contact us for the schedule covering your dates.

ELIGIBILITY

- A **secondary degree** — high school diploma, GED or global equivalent
- **21 contact hours** of formal training in agile practices, frameworks and methodologies
- Plus one of the following four:
 - — two years of agile experience within the past five years
 - — one year, plus a degree from a PMI GAC-accredited program
 - — one year, plus an active third-party agile certification
 - — an active **PMP**, which satisfies the experience requirement outright

PMI requirements, current as of 31 August 2026. The old 2,000-hour general project experience prerequisite no longer applies, and an active PMP now satisfies the experience requirement outright.

TARGET AUDIENCE

- Anyone considering an agile approach to project delivery
- Project managers, program managers and IT managers or directors
- Analysts, developers and testers
- Software engineers, architects and software managers
- Testing managers and team leaders

DELIVERY METHODS

- Instructor-led training
- Immersive live-online training
- On-site and custom delivery

COURSE OVERVIEW

thinQtank® Learning offers a unique training camp preparing you for the **PMI Agile Certified Practitioner** certification exam. As with all our training experiences, the exam is delivered in the classroom.

The camp does two things at once: it prepares you to lead your next agile effort, and it prepares you to pass the exam. Through real-life scenarios you will review agile principles and practices, and the collaboration that makes them work.

PMI rebuilt this exam for **March 2026**. The old seven-domain structure, organised around tools and techniques, has been replaced by four domains — **Mindset, Leadership, Product and Delivery** — and the eligibility rules changed at the same time.

PMI, PMI-ACP, PMP, CAPM and PgMP are registered marks of the Project Management Institute, Inc.

EXAM

PMI-ACP — Agile Certified Practitioner

120 questions — 100 scored plus 20 unscored · 180 minutes · one 10-minute break after item 60 · 10 languages.

PMI rebuilt this exam for **March 2026**. The seven-domain, tools-and-techniques structure is gone, replaced by four domains organised around how agile practitioners actually work.

New Examination Content Outline published November 2024, effective for the exam from March 2026. Verified on pmi.org, 31 August 2026.

EXAM DOMAINS MARCH 2026 EXAMINATION CONTENT OUTLINE

I. Mindset		28%
II. Leadership		25%
III. Product		19%
IV. Delivery		28%

TWO ROUTES IN

PMI-ACP needs 21 contact hours of agile training — not the 35 the PMP requires — plus agile experience. There are four ways to satisfy the experience half, and holding an active **PMP** is one of them.

PMP → **PMI-ACP** EXPERIENCE WAIVED

EXCLUSIVE LEARNING PACKAGE

- Custom exam prep materials mapped to the current Examination Content Outline
- Practice questions designed to teach through practice rather than test recall
- After-course instructor coaching benefits
- Exam voucher included, and the exam delivered in the classroom

COURSE OBJECTIVES

On completing this course you will be able to:

- Understand the agile principles and practices that transform team performance and improve customer satisfaction
- Empower and inspire your team
- Actively manage a project's scope, to help ensure delivery of the best possible product — even where that differs from what was planned
- Know and collaborate with customers for better results
- Use the most powerful metrics to ensure teams continuously improve their development and delivery
- Avoid the pitfalls many teams fall into when adopting agile practices
- Coach a new or an existing agile team
- Manage dynamic projects in the most unforgiving environments
- Understand why studies find agile teams significantly happier with their work, and secure that benefit for your own team
