

OUR LEARNING EXCLUSIVE

- Custom exam prep software and materials
- Exam delivery in the classroom, with a **98% success rate**
- **We do not teach the test.** Extended hours of immersive, hands-on work
- All reading material and study guides sent to you when you register
- Every course taught by working project and delivery managers

TRAINING CAMP FORMAT

thinQtank® Learning delivers this course as an **instructor-led training camp**, with the exam sat in the classroom as part of the camp. Camps are scheduled by cohort rather than to a fixed calendar, and the balance of lecture and workshop time is set to suit the group and the delivery method. Contact us for the schedule covering your dates.

PREREQUISITES

- No certification is required to sit this exam
- Familiarity with a working IT environment — who does what, and how work reaches them
- CompTIA recommends six to twelve months managing projects in a technical environment — a recommendation, not a bar to entry

TARGET AUDIENCE

- Technical staff who have inherited project work without the title
- Business analysts, coordinators and team leads formalising how they run delivery
- Project managers who need a vendor-neutral credential that is not tied to one methodology
- Anyone preparing to go on toward PMP or a similar professional credential
- Service members, veterans and military spouses using AF COOL, Army CA, MyCAA or VET TEC 2.0

EXAM

PK0-005 — CompTIA Project+

90 questions, 90 minutes, pass 710 of 900.

CompTIA Project+ is vendor-neutral and methodology-neutral, and carries no continuing-education requirement — the certification does not expire, so there is nothing to renew.

DELIVERY METHODS

- Instructor-led training
- Immersive live-online training
- On-site and custom delivery

COURSE OVERVIEW

thinQtank® Learning offers an industry-unique training camp in which students earn the **CompTIA Project+** certification. As with all our CompTIA training experiences, the exam is delivered in the classroom.

Project+ is the vendor-neutral credential for the person actually running the work. It is not tied to one methodology: students learn predictive, agile and hybrid delivery and, more usefully, when each one fits. It covers the full life cycle — from a charter that survives contact with a sponsor, through schedule, risk, change and communication, to closing a project properly.

The course maps to exam **PK0-005**, with objective coverage marked throughout. Students carry one case study from initiation to closure across the week, producing the artifacts as they go, and take the exam in the classroom on the final day.

WHAT YOU WILL BE ABLE TO DO

- Run a project end to end without inventing the process as you go
- Choose predictive, agile or hybrid delivery on the merits, not on habit
- Produce the artifacts a sponsor and an auditor both accept
- Communicate status so problems surface while they are still cheap

COURSE OBJECTIVES

Primary course objectives:

- Apply core project management concepts, roles, constraints and success criteria
- Work in predictive, agile and hybrid life cycles, and choose between them
- Initiate a project: charter, sponsor, stakeholders and scope that holds
- Plan schedule, cost, resource and quality, and build a realistic baseline
- Identify, assess and respond to risk before it becomes an issue
- Run change control so scope moves deliberately rather than quietly
- Communicate status to technical and non-technical audiences
- Handle vendors, procurement and contract types
- Close a project: acceptance, handover, lessons learned and release of resources

EXCLUSIVE LEARNING PACKAGE

- Project artifact pack: charter, schedule, risk and change templates
- Worked case study carried through the whole camp
- Project+ video course
- Vendor and procurement document set
- Project+ reading plan and review guide
- Project+ certification practice exam

COURSE MODULES

01 Project Management Concepts 33%

- Topic A: Roles, responsibilities and the project environment
- Topic B: Constraints, success criteria and trade-offs
- Topic C: Predictive, agile and hybrid approaches
- Topic D: Team dynamics, conflict and stakeholder management
- Topic E: Communication planning and status reporting

02 Project Life Cycle Phases 30%

- Topic A: Initiating: charter, sponsor and scope
- Topic B: Planning: schedule, cost, resource and quality
- Topic C: Risk identification, assessment and response
- Topic D: Executing and monitoring the work
- Topic E: Change control and issue management
- Topic F: Closing: acceptance, handover and lessons learned

03 Tools and Documentation 19%

- Topic A: Charters, plans, schedules and registers
- Topic B: Estimation and tracking techniques
- Topic C: Vendors, procurement and contract types
- Topic D: Reporting artifacts that stand up to audit

04 Basics of IT and Governance 18%

- Topic A: The IT environment a project lands in
- Topic B: Governance, compliance and policy constraints
- Topic C: Data handling, privacy and security considerations
- Topic D: Operational handover and support readiness

WHAT IT COSTS, WHAT IS INCLUDED

Training camp, five days	\$2,650
CompTIA Project+ exam voucher (PK0-005)	\$360
Exam sat in the classroom on the final day	included
Retakes of any part of the course for 24 months	included
Six months mentoring with our engineers	included

WAYS TO PAY

- **AF COOL** — Air Force and Space Force enlisted
- **Army Credentialing Assistance** — enlisted and warrant officers
- **MyCAA** — military spouses
- **VET TEC 2.0** — veterans and separating service members
- **thinQflex™** — name your own price, paid over twelve months

WHERE IT RUNS

- **Sterling, VA** — 21481 Ridgetop Cir
- **Atlanta, GA** — 431 Marietta St NW
- **Burbank, CA** — 3301 N San Fernando Blvd
- Five days, Monday to Friday. Also delivered live-online and on-site.
